Una iglesia dos localidades
La Ceiba, Honduras

“2012 has been a year of many changes, the events that have happened changed our lives, The Lord has been teaching us to strengthen our faith and depend totally on Him.”

Our Church

The leadership of the Church grew and more volunteers are serving in the different church ministries.

About 80 people have been baptized making a public display of their commitment to God.

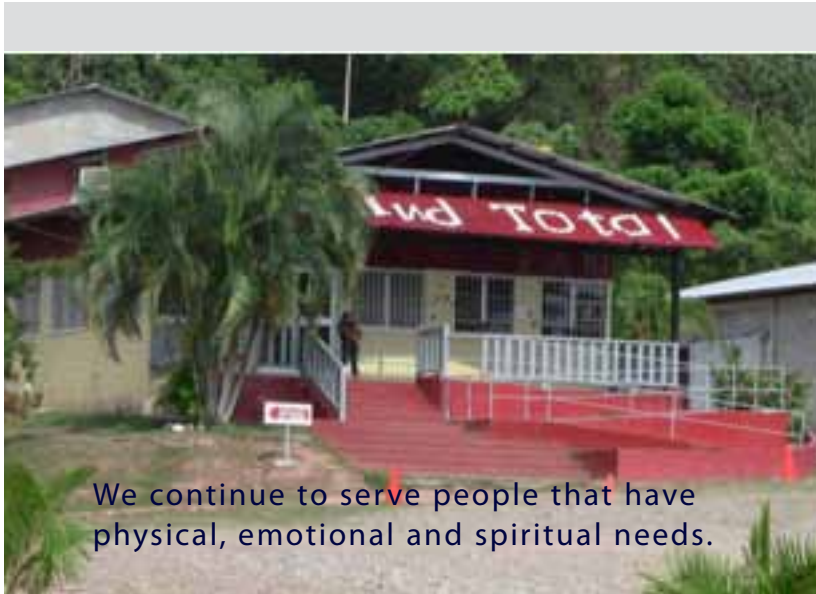

Through the help of our partnering churches and our local church body we have been able to build 50% of the wall that surrounds the church property.

We have been preparing for our largest outreach event of the year, our musical Christmas play “The King was Born”. We expect 7000 people to attend during the seven day presentation of the play.

Total Health

We continue to serve people that have physical, emotional and spiritual needs.

There has been close to 7000 patients visited our clinic and more than 150 have received Christ as their personal Savior!

Medical mission teams have a huge impact in reaching people in remote communities that do not have any access to medical care.

Total Home

Thanks to support of Mission Teams we had constructed eight houses this year! Now this families are able to start a new life in their new home.

We are thankful with what God is doing because 50 % of the families of CDI have received a house from the ministry.

We are encouraged to continue building houses because we can't ignore the great necessity in the community. We believe God will continue to provide the resources we need to continue the ministry.

Presently there are 104 kids from Kindergarten to 7th grade attending CDI. We are very thankful for their sponsors who make it possible to run the program. CDI is growing as our children advance in their education. In 2011 70% of the 6th graders that graduated attended high school this year. There are 14 6th graders graduating this year and we are very proud that all of them have decided to continue in their studies next year.

Lord willing many of our kids will be able to participate in our new ministry "Total Workshop".

Total Workshop

The CDI program helps school age children by providing nutrition, spiritual guidance, medical attention and tutoring. We have recognized the need to advance our program through a vocational training center, which is called Total Workshop. The kids that will participate in the program will have the opportunity to learn skills in carpentry, electricity, welding, sewing, and jewelry making.

We have a training center built that is ready to be remolded. There are volunteers that are willing to invest their time to train the kids. Our kids are looking forward to the possibility of learning a skill that can change their futures.

We pray that in 2013 God continues molding and transforming us into His image. May God find us faithful in being a biblical church, loving Him, and serving others with His compassion.
